A GYMNASTIC POSITION FOR THE DOMESTIC WOMAN,

By Shirley Dare.

Do you know that the faces of women n to me like pictures in a Chinese book,

make the light what thoughts possess womand and the wrinkles from women's faces and the strain of nervous exhaustion from the spirits of the whole family.

One lessen, perhaps, will give insight into many points. Taking life easy is three tighting all the flower, flavor and grace out of the servation of beauty, or the key to the preservation of beauty. Women of a certain age seldom used to be lovely, because they silver.

In most families who do their own work, or part of it, this disagreeable detail takes Is Crowded Almost Constantly thrice the time and attention necessary tross the garden fence and drift into as I found, when having a family to supsurden paths for a moment, only to end bing home by moonlight after tea.

Worth houseroom, it was necessary to make worth houseroom, it was necessary to make nice adjustment of time. Work meant the meant nine to fourteen hours study and

writing at top speed for each.

Housekeeping came by way of diversion, any how it was a rest after the close mental tension of three half days. Then I would market for things which could be would market for things which could be cooked at a glance, so to speak, chops and eggs, sausages and steaks, and jars of vege-table hash from the best shop, ready to heat over in three minutes, or pots of ready-baked beans and accompanying brown bread, to be served hot the first day, toasted the next and fried for breakfast

smells telling the tale of my sad house-wifery. Sink and kitchen are odorless and dainty as the guest chamber with its porce-lain basins and snowy towels. I could not and would not put up with the heavy steps and slow motions, the malodorous presence and clumsy ways of common help, so they were discarded and the weekly wage put into housekeeping conveniences and sup-plies.

Now the beauty of dishdrainers and mops and cedarwood tubs and swing trays is that they don't eat anything, don't waste that they don't have anything, and don't anything, don't break anything, and don't have days out inconveniently. Also they don't have tempers and create friction do-mestically.

cont have tempers and create friction domestically.

After each meal, the spoons, knives and forks are collected from the table into a quart pail nearly full of clean soapsuds with half a teaspoon of ammonia in it, and set in the sink.

The food is put away in the ice box and window safe, the plates and dishes are scraped and set in a tub of soapsuds, cold or hot as convenient, the cups and saucers go into another tub or pan likewise. The white table cloth is shaken, folded in two and hung to air in the sun.

Then the pail of silver has a shake or two, and the water is poured off, and the things are rinsed and wiped.

All this takes less than five minutes, and the dining room work is done. All cooking things are thoroughly cleared of their contents when the food is taken up, and immediately filled with water with a spoonful of liquid lye in it, and replaced to heat till the meals in contents.

immediately filled with water with a spoon-ful of liquid lye in it, and replaced to heat till the meal is over.

Then a whisk of the chain cleaner with its long wire handle turns them out ready

for rinsing and wiping with a clean coarse towel—half a minute's work apiece.

Baking pans and cups go into a pan of cold water and wait their turn with the other dishes. My hands have not been wet in the entire process and escape the misery of soaked and swollen fingers, parboiled palms, and backs discolored with distiwater, which betray the untaught house keeper. And there is nothing unusual in the neat kitchen except three bright pans and tubs of orderly piled dishes, covered

DISHES DRY OFF THEMSELVES.

When ready to attack them, the water is poured off and fresh hot suds poured over the panful, the clean pieces are lifted into the drainer, set in a large pan to fit, hot water poured over them, and the drainer set on the window shelf in the sun and air, or at the back of the range a few minutes when they are ready to set away. Wiping is a mere flicking off a stray drop

of water here and there.

Piled in open order, with hot water poured over them and set in a current of air, dishes dry off themselves better than any one can wipe them. Crooked pitchers and jars are washed out with a mop, scalded and turned upside down to dry without wiping by the best housekeepers. They dry more thoroughly and with less danger of breakage in this way, and why isn't the method just as good for all the china?

I find it comes out glossy and fine enough to suit the most exacting finger-tips which would never pretend to use restaurant or hotel silver and ware without first polishing it with a corner of one's

tables, where the ordinary tiresome routine of washing and wiping is gone through, three times a day, and only a high sense of politeness restrains the impulse of the tactile sense at the touch of the ill-dried

When I went to a co-operative club there seemed nowhere anyone was wanted, in any department, except that of washing the dishes. An ex-farmer and an Episcopalian minister were discharging the du with sturdy resignation, after a fashion. I am not ashamed to say I plotted and un-dermined those men out of their office in two days, and undertook the job single-
